

For the best results

Perfect for the fresh food counter

Visibility and legibility

The screen is perfectly set for visual sales promotion, with clear eye-level viewpoints for the shopper. With the Flexible Scale Display System, the screen tilt angle and height can be individually adjusted to suit your sales area – including counter height and cash drawers. Information and advertising are most effective when they reach the customer.

Ergonomics and operation

Fast. Intuitive. Extremely easy to operate. The adjustable touchscreen offers maximum ergonomics and comfort during item searches and function selection. This allows your employees to work without strain, and ensures fast, error-free weighing and operating processes, even at peak times.

Training and advice

Providing information about hygiene, keeping staff informed about new regulatory policies, or giving expert advice about recipes and information about ingredients or origin: The touchscreen is the perfect platform for innovative employee training and valuable tips during the sales process.

Design and hygiene

Form follows function: Flat, classic designs, which fit perfectly into a modern store. Easy on the eyes – and at the same time, very practical and hygienic. The daily maintenance of the scale is made easy thanks to its heavy-duty and easily cleanable surfaces.

UC-HTT-M

High-end PC scale with large customer screen

UC-HTT-M is the first choice for anyone who wants to sell a variety of fresh foods. With its fast processor, large RAM and hard drive, the scale has enough resources for the most demanding applications. Thanks to its 12.1" customer screen and touchscreen with brilliant LED backlight technology, UC-HTT-M is the perfect companion for promoting sales emotionally and visually at the service counter. The optional real-time access to fresh information also increases employees' ability to give advice during the sales process – which pays off.

UC-HTT-M is available in black and silver housings.

- **Visual sales promotion at the point of sale – encourage impulse purchases**
- **Advertisements for cross-selling – strengthen margins by generating additional income**
- **Personal customer advice – a high standard of expertise is persuasive**
- **Efficient business processes – seamless integration into goods management**

For the most stringent demands

The UC Evo Max Line is the METTLER TOLEDO PC scale family for the most stringent demands. The UC Evo Max Line supports a wide variety of fresh food. It also supports CPU-intensive applications, such as multi-media sales promotion at the point of sale. The UC Evo Max Line will convince you with its easy networkability and support for third-party applications.
